Four Legs One Home

This is Ice Cube. We got him during covid nearly seven years ago. What started out as an idea my Brother and I never thought would come through turned into a member of the family we will always remember. He was a rescue from a shelter that takes dogs off the street. When we got him he was 10 months old and living with a lady who's house was full of foster dogs. The other dogs in his litter were all named after rappers as well so we thought we had to keep it.

He came from an abusive household. When we first got him he was scared of everything and hid from all of us. It took a month of us sleeping downstairs on the couch with him for him to be comfortable going up the stairs. Ever since then he has warmed up

a ton toward people and is very friendly. Nowadays he spends his time sleeping and occasionally going on walks.
