The Los Angeles Dodgers are just one win away from securing their 8th World Series title against the New York Yankees. With their lack of strength in the bullpen, the Dodgers embrace a tough challenge as to how to manage the stacked offense of the Yankees. Dodgers manager Dave Roberts has done a spectacular job this season with using his strong relievers and closers during games when the starters and injured pitchers were out of commission. The Dodgers have made 12 Postseason appearances in the last 17 seasons as well as 8 consecutive division titles from 2013-2020. The Dodgers were victorious in Game 5 against the Yankees after a wild 5th inning comeback stretch that led them to a World Series title.
